

# Slash your energy costs!

## LOWER YOUR UTILITY BILL BY UP TO 20 PERCENT.

Installing solar screens provides shading from sunrise to sunset.

Here's what one satisfied customer has to say

“Textilene brand solar screen reduced the heat 5 to 10 degrees per room where installed in my home.”

Solar screen can dramatically lower heat in your home or office building.

In fact, installing solar screens can slash your energy costs by up to 20 percent! Solar screens are perfect for windows, doors and skylights. They block 80% to 90% of the sun's harmful rays, reduce glare and provide daytime privacy.

TEXTILENE® is a registered trademark of Twitchell Corporation

*Only the Original will do!*

**TEXTILENE®**  
BRAND FABRIC

*Block the sun...  
not the view.*

**TEXTILENE®**

**ENERGY SAVING SOLAR SCREEN**

Now you can dramatically cut your summer utility bill ... and protect your furnishings from fading because of UV ray damage. Ask your local dealer how.

---

Another satisfied customer says

“We realized about a 20% decrease in our utility bill during the summer months which we attribute to solar screens.”

---

Select from a variety of screen colors to match your home or building decor.

*And...*

A Twitchell Solar Screen Warranty is available for as long as you own your home or property.
